

Testimony on Real ID Act

Mr. Chairman and Senators,

I don't like the federal government, our legislators and senators, passing laws that are strictly against the constitution. Our government is taking our state's rights away from "We the People" here in Montana.

The 4th amendment to the federal constitution spells it out and I quote, "the right of the people to be secure in their persons, houses and papers and affects against unreasonable searches and seizures shall not be violated."..... unquote.

It also is against the 9th and 10th amendments.

We don't want to have an R.F.I.D. chip imbedded in our identification. This compromises our privacy.

We don't believe this national ID card should be implemented in Montana.

Here's a question to think about: Is this ID card really intended to keep away terrorists,...or just to keep track of our own citizens? You be the judge!
